

BLUEDENT LED

*the power of light*

Light source	LED module
Emitted light wavelength	430 - 490 nm
Timer	10 sec. - 99 min.
Battery	Li-Ion 3.7V 2100mAh
Curing modes	R, F, L, P - see diagram below
Micro fan cooling	+
LED module overheating protection	+
Weight of handpiece (with battery & lightguide)	245 g
Weight of charging base	560 g

**Diagrams of curing and bleaching modes**

All BLUEDENT products are in conformity with MDD 93/42/EEC requirements.

LED curing lights

charging station with light intensity meter  
LONG curing mode-possibility for working unlimited time  
RAMP, FAST, PULSE curing modes help to avoid stress in restorative material and increase depth of polymerization  
single high-tech long life LED module using latest achievements in LED technology  
emitted wavelength 430-490 nm  
polymerization + bleaching in 1 product!  
no IR and UV (heat) radiation  
digital display providing information about selected curing mode, timer and remaining time  
autoclavable black fiberoptic glass lightguide  
easy ambidextrous control  
micro fan cooling  
powered by Li-Ion battery memory free
