The use of magnifying loupes will increase your visual activity and reduce eye strain. Careful selection of working distance and correct viewing angle will avoid back and neck strain by allowing a comfortable working position.

Three easy steps to select your Magni Vision Binocular Loupe:

1. First you select the loupes magnification , there are 2X, 2.5X, 3X and 3.5X. If you are first time using the loupes, we suggest you to select the lowest magnification that will meet your needs. The lower the magnification, larger the field of view and easier the loupes to use.
2. Then determine your working distance, which will also automatically determine your field of view. Loupes working distance have short , middle and long working distance.
3. Finally, select your preferred spectacles frame option.
